Managed Cisco® Meraki® Access Solution

Helping CSPs and Enterprises to transform, connect, and run Cisco Meraki networking solutions

Businesses and IT departments must adapt quickly to support remote work and other new demands. Current IT trends are putting massive pressure on networks and making them more complex to manage.

Challenges Meraki Access can help you address

Many networks were not designed for the modern ways of working – IoT, mobility, video, and cloud are creating bandwidth and capacity pressure. In addition, organizational silos have left many companies unable to achieve the benefits from some of these newer technologies. The NCR Managed Meraki Access Solution allows users to seamlessly manage WiFi deployments and multi-site networks with remote access, network-wide visibility and control, self-learning RF optimization, and more. This solution addresses key challenges facing today's enterprises:

- **Mobility and collaboration in a modern digital workplace.** An optimized, wired and Wi-Fi enabled workplace supporting business performance, better collaboration, secure, and flexible work-life balance.

- **Improved customer-centricity and user experience:** Analytics and data-driven insights that provide visibility, create competitive advantage and improve customer and end user experience.

- **Consistent network availability and performance**: Our Managed Meraki solution offers proactive, automated, real-time monitoring and operational management of your LAN and Wi-Fi networks so you can focus on your core business.

- **Reduce risk.** Robust protection through self-learning and adaptive networks. Security embedded and integrated as part of the network functions, capable of detecting and defending threats in real-time, giving business peace of mind that their sensitive information is safe and secure.

- **Flexibility:** Our three-tier Managed Meraki offers with service rich capabilities is created uniquely to ensure optimal service delivery and improve agility of your organization to respond faster to the needs of your business.

- **Cost savings.** By having team of experienced expert and certified professionals to monitor proactively, manage, and maintain your Meraki Access infrastructure, your organization benefit from reducing cost associated with management tools, hiring, and training in-house IT staff to maintain and manage your Meraki infrastructure 24 x 7

Complete Visibility with Managed Meraki Access

The rise of mobile devices, IoT, and video services is putting strain on networks, specifically wireless LAN. Network managers need to support high-bandwidth and low-latency applications while maintaining quality of service. This task can be difficult and require manual configurations. IT teams are looking for solutions to ease the pressure caused by increased network traffic and improve user experience while reducing costs. They are also seeking to improve end-user experience, visibility, application performance, and management for both LAN and wireless LAN networks..

With a Managed Meraki Access Solution, companies can transform the way their wired and wireless networks are designed, deployed, managed and maintained. Additionally, a Managed Meraki Access Solution allows companies to utilize insights to enable their own IT help desk to triage user issues before escalating to the Managed Services Provider. Users have complete visibility to see further into their LAN, wireless LAN, clients, and applications from a single pane of glass dashboard.

Increase productivity with real time monitoring of network performance to help organizations to quickly identify, resolve network issues and reducing downtime.

Managed end-to-end solution to run your Meraki Access smoothly and securely.

Built-in security features in the next-generation Wi-Fi to protect networks from malicious attacks.

Agility and adaptability for changing business conditions while delivering applications quickly, reliably, and securely.

Better business insights using detail analytics and Machine Learning help organization to unlock new opportunity and competitive advantages while enabling better customer experience.
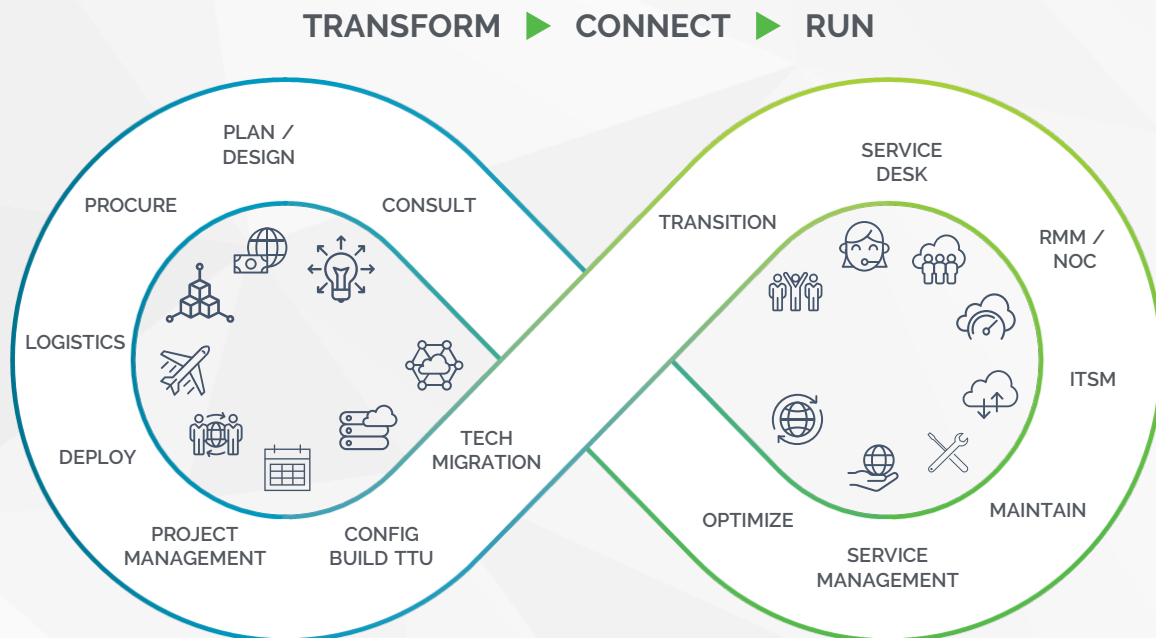

Meeting Business Goals with One Complete Package

Managed Meraki Access combines the breadth of NCR's End-to-End Services with Meraki solutions. The package includes Meraki hardware and licenses in conjunction with NCR's hardware fulfillment, design, deployment, remote services, and labor management.

This comprehensive solution helps customers improve network and application performance while reducing costs. The result is a flexible and cost-effective LAN and Wi-Fi that enables our clients to realize the benefits of digital infrastructure transformation without the associated operational and administrative challenges of managing a complex network environment.

As a knowledgeable partner for your business, NCR offers the following:

- Improved end-user digital experience with secure, high availability, and intelligent networks
- Expert advice and experience, including an understanding of your business and technical requirements
- Global coverage, single point of contact, accountability, and the right information on which you can base your business decisions

TRANSFORM ▶ CONNECT ▶ RUN

Transform	Connect	Run
A consultative process to help identify the gaps between your present and ideal future. We'll help move your organization towards your business goals by defining how and where technology can be used to connect securely, more effectively, and efficiently to create a comprehensive design based on business requirements, existing technology landscape, and product capability.	The ultimate focus—in every delivery engagement—is to ensure the technology is implemented on time, on budget, with minimal disruption. Our professional services include high level design (HLD), low level design (LLD), site deployment planning (SDP), and build workbooks. Experienced project managers oversee deployments to ensure seamless integration into existing systems.	NCR services are designed to maximize uptime and relevance of technology to the organization. From end-to-end incident management and field services to remote monitoring and optimization, NCR is your single-point-of-contact to customers connect securely, more effectively, and efficiently in order to gain competitive edge.

NCR: A Knowledgeable Partner for Your Business

As a comprehensive services provider for top CSPs and OEMs, we can help you outpace your competitors by deploying, supporting, and managing Cisco Meraki's leading Access solution in various environments. Our worldwide presence across 160 countries combined with proven experience and capabilities across the leading Access solutions separate us from others. NCR can help by:

- Providing global depth and breadth for Access technology services

- Helping you improve operational efficiency by offering a one-stop-shop and one global continuous operation

- Deploying and supporting agile, flexible, efficient, and high-performance Access solutions for you and your customers

- Providing broad technical expertise through continuous investment in technology innovations, technical training and skills

- Augmenting your portfolio to address customer demand for fully managed Access solutions

- Delivering high SLA performance consistently around the globe, resulting in world-class customer experience

- Supporting requirements for engineers trained in Health, Safety, Security and Environmental (HSSE) standards

- Delivering extensive parts and logistics capabilities: 1,100+ stocking locations and 180K+ parts managed

Why NCR?

NCR Corporation (NYSE: NCR) is a leader in transforming, connecting and running technology platforms for self-directed banking, stores and restaurants. NCR is headquartered in Atlanta, Ga., with 38,000 employees globally. NCR is a trademark of NCR Corporation in the United States and other countries.
