

Managed Cisco Meraki™ Security Solution

Helping CSPs and Enterprises to transform, connect, and run Cisco Meraki™ networking solutions

The trend of remote working has increased the need for secure and reliable connectivity for employees, and this has put pressure on IT teams to provide secure access to company resources while also ensuring compliance with security regulations. In response, IT organizations are seeking ways to provide security at every point in the network and with every customer interaction, as well as providing employees with secure and reliable access to company resources from anywhere.

Benefits of Managed Meraki™ Security Solution

The Managed Cisco Meraki™ Security Solution provides businesses with a comprehensive security solution that adapts to the evolving needs of your organization. The solution addresses key challenges facing today's enterprises:

- **Reduce risk of security breach:** The ever-increasing reliance on the internet as well as the increase of mobile devices in our networks means that business are more prone to security threats. Meraki's security features, such as firewall, VPN, and intrusion prevention, can help protect against cyber threats and keep data secure.
- **Improve user experience:** Staying connected at all times from anywhere in the world is a necessity now that organizations operate with and support a remote workforce. With the use of a VPN, employees can securely connect to their company resources regardless of where they're located.
- **Increase network performance and superior scalability:** Cloud-based management platform, built-in security, and Auto VPN features help optimize network performance and scale with organization's growth and challenging needs while ensuring consistent and secure connectivity.
- **Lack of skilled resources and management tools:** The complexity of managing security infrastructure combined with a lack of centralized administration and management increases the need for a highly skilled team to maintain and manage the infrastructure 24x7.
- **Increase IT team productivity:** By having a Managed Service Provider to manage your security infrastructure, your organization can reduce IT costs and free up internal resources to focus on more strategic activities.

Complete Visibility with Managed Meraki™ Security

Many organizations have implemented and continue to support remote work environments. A recent Gartner study reported that 74% of surveyed organizations plan to keep at least 5% of their workforce remote post-pandemic¹. As remote work becomes more prevalent, it is crucial to also prioritize cybersecurity measures to protect against potential cyberattacks.

The flexibility of remote work can lead to increased productivity and user experiences, but it also poses security challenges, particularly for small and medium-sized businesses with limited resources. With a Managed Meraki™ Security solution, companies can utilize insights to enable their own IT help desk to triage user issues before escalating to the Managed Services Provider. Users have complete visibility to see further into their network, giving them the ability to identify potential security threats with traffic analysis and event logs.

Efficient and simple deployment with self-provisioning, self-optimizing hardware, and configuration templates with a single view panel.

Managed end-to-end solution to run smoothly, securely, and efficiently.

Built-in security features to protect networks from malicious attacks backed by Cisco Talos®.

Agility and adaptability for changing business conditions while delivering applications quickly, reliably, and securely.

Secure branch office with feature rich, scalable, and maintain compliance with industry and regulatory standards.

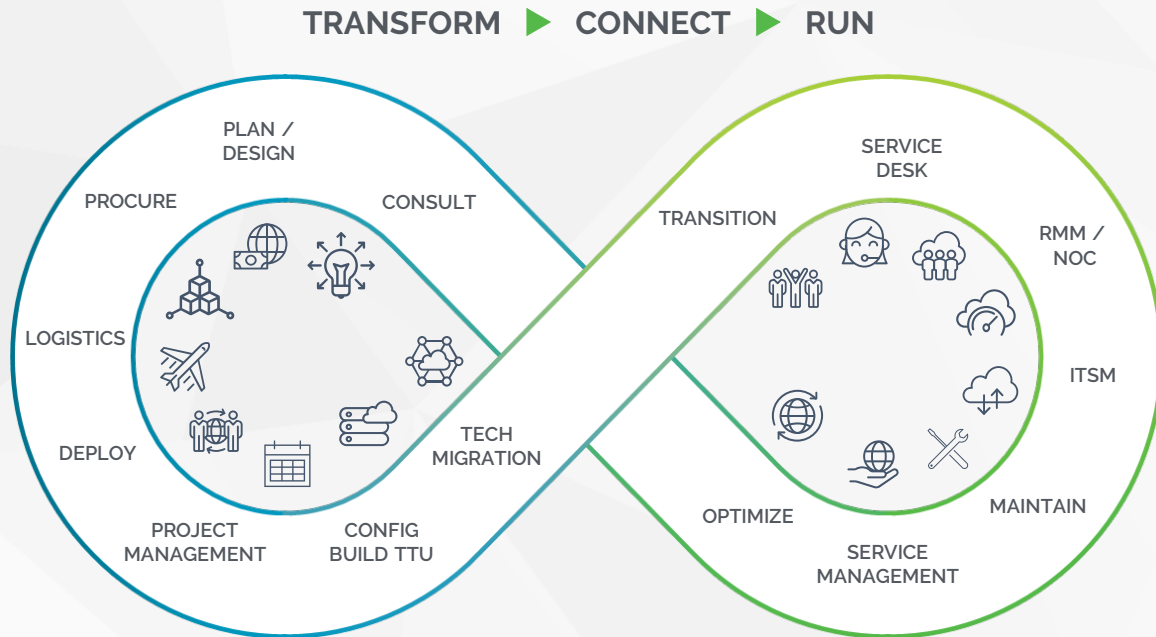

Meeting Business Goals with One Complete Package

Managed Meraki™ Security combines the breadth of NCR's End-to-End Services with Meraki™ solutions. The package includes Meraki™ hardware and licenses in conjunction with NCR's hardware fulfillment, design, deployment, remote services, and labor management.

This comprehensive solution harnesses the power of Cisco Meraki™ Security and Cisco Talos® to provide a comprehensive and flexible solution that improves network and application performance while reducing costs for our clients. With advanced security features such as intrusion detection and prevention, malware protection, and content filtering, our solution helps prevent cyber threats before they can infiltrate your network, reducing the risk of costly data breaches and downtime. By providing a centralized dashboard and automated updates and patches, we simplify network management and reduce the risk of costly errors, allowing our clients to focus on core business objectives.

As a knowledgeable partner for your business, NCR offers the following:

- Improved end-user digital experience with secure, high availability, and intelligent networks
- Expert advice and experience, including an understanding of your business and technical requirements
- Global coverage, single point of contact, accountability, and the right information on which you can base your business decisions

Transform

A consultative process to help identify the gaps between your present and ideal future. We'll help move your organization towards your business goals by defining how and where technology can be used to connect securely, more effectively, and efficiently to create a comprehensive design based on business requirements, existing technology landscape, and product capability.

Connect

The ultimate focus—in every delivery engagement—is to ensure the technology is implemented on time, on budget, with minimal disruption.

Our professional services include high level design (HLD), low level design (LLD), site deployment planning (SDP), and build workbooks. Experienced project managers oversee deployments to ensure seamless integration into existing systems.

Run

NCR services are designed to maximize uptime and relevance of technology to the organization.

From end-to-end incident management and field services to remote monitoring and optimization, NCR is your single-point-of-contact to customers connect securely, more effectively, and efficiently in order to gain competitive edge.

NCR: A Knowledgeable Partner for Your Business

As a comprehensive services provider for top CSPs and OEMs, we can help you outpace your competitors by deploying, supporting, and managing Cisco Meraki's solution in various environments. Our worldwide presence across 160 countries combined with proven experience and capabilities across the leading Meraki™ solutions separate us from others. NCR can help by:

Providing global depth and breadth for Meraki™ technology services

Helping you improve operational efficiency by offering a one-stop-shop and one global continuous operation

Deploying and supporting agile, flexible, efficient, and high-performance Meraki™ solutions for you and your customers

Providing broad technical expertise through continuous investment in technology innovations, technical training and skills

Augmenting your portfolio to address customer demand for fully managed or Meraki™ solutions

Delivering high SLA performance consistently around the globe, resulting in world-class customer experience

Supporting requirements for engineers trained in Health, Safety, Security and Environmental (HSSE) standards

Delivering extensive parts and logistics capabilities: 1,100+ stocking locations and 180K+ parts managed
